

AI-Driven Hyper-Local Business Advisory and Financial Structuring Assistant for Rural Micro-Entrepreneurs

- Problem Statement ID – 26091
- Problem Statement Title -
AI-Driven Hyper-Local Business Advisory and Financial Structuring Assistant for Rural Micro-Entrepreneurs
- Theme - Agriculture, Food Tech & Rural Development
- PS Category- Software
- Team ID – SIH26-A0H-T076
- Team Name-Quantum Codex

AI-Driven Hyper-Local Business Advisory and Financial Structuring Assistant for Rural Micro-Entrepreneurs

PROPOSED SOLUTION

AI-Driven Hyper-Local Business Advisory & Financial Structuring Assistant for Rural Micro-Entrepreneurs

- Hyper-local, not generic
- Deterministic loan engine
- Multilingual + voice
- Explainable AI output
- Admin-configurable rules

Team: Quantum Codex

"Converts a rural entrepreneur's location, margin money & business idea into a localised feasibility report + personalised loan plan."

USER JOURNEY

1. Select language (EN / Tamil / Hindi)
2. Enter village · block · district
3. Input margin capital + business idea
4. System validates location
5. Financial engine calculates loan
6. AI analyses demand & risks
7. Feasibility report generated
8. Scheme + EMI plan delivered

WHAT IT SOLVES

- Wrong business choice → Hyper-local demand analysis
- No loan clarity → Deterministic EMI engine
- Language barrier → Multilingual + voice
- Generic advice → Village-specific SWOT
- Scheme confusion → Auto scheme router

SIX CORE MODULES

Hyper-Local Market Intel
Demand, density & competitor mapping

Feasibility SWOT Engine
Risk matrix & opportunity score

Financial Calculator
EMI, moratorium & scheme router

AI Advisory (RAG)
LLM on verified structured data

Multilingual & Voice
Tamil · Hindi · English + TTS

Admin Panel
Configurable scheme rules

END-TO-END DEMO FLOW

Location + Margin

Business Category

Local Data Pull

Financial Engine

AI Analysis

Report + EMI Plan

≤₹1.40L → Micro Finance | ₹1.40L–₹50L → Term Loan | Interest: 6.5% – 8% | Tenure: 3–7 years | Moratorium: 3–6 months

MODULE 1 — HYPER-LOCAL FEASIBILITY ENGINE

FEASIBILITY ANALYSIS

Validating Market, Technical & Financial Viability

- Validated across market, technical & financial dimensions
- Built on a production-ready, proven technology stack
- First-mover advantage — no direct competitor in this space
- Clear path to scale as a post-hackathon SaaS product
- Aligned with national financial inclusion priorities

Team: Quantum Codex

IDEA VIABILITY ASSESSMENT — AI-Driven Hyper-Local Business Advisory for Rural Micro-Entrepreneurs

MARKET FEASIBILITY	TECHNICAL FEASIBILITY	FINANCIAL FEASIBILITY
650M+ rural population; <30% receive formal business guidance	RAG pipelines proven for structured domain advisory at scale	Zero marginal cost per query after initial infrastructure setup
6.3 Cr active MSME beneficiaries under central govt schemes	Tamil/Hindi STT mature via Whisper & Google STT APIs	MVP: React + FastAPI + Claude API — buildable in 36 hrs
NSFDC disburses ₹1,000 Cr+ annually — awareness remains critically low	Deterministic EMI engine — zero AI guesswork on financial figures	Govt API integrations (NSFDC, SIDBI, Udyam) are publicly available
75% loan applicants lack basic financial literacy (SIDBI report)	Lightweight REST API works on 2G/3G — payload <5 KB per request	Post-hackathon: SaaS licensing to banks, SCAs, and MFIs
Rural smartphone users crossed 50 Cr in 2024 — access is ready	Schema-validated LLM output prevents hallucination of key numbers	No new hardware required — runs on any smartphone browser
●●●●○ Strong Demand	●●●●● Proven Stack	●●●●○ Viable Model

IMPACT FRAMEWORK — WHO WE SERVE & WHAT CHANGES
